

Individual Progress Report

Update of own time lines for completion

Week	Task	Finalized
1	Form group, get familiar with group members, know each other's skill	Yes
2	Meet with client, identify project deliverables Define group roles, creating Bitbucket repo & Slack team	Yes
3	Background research on current market, brain-storming methodology	Yes
4	Prepare to start writing proposal, provide feedback of research, identify the still-needs & outline the methodology and technical strategy	Yes
5	Finalize proposal, start building visualizations, help building database	Yes
6	Start to build-up visualization preview, interact with UI designer	Yes
7	Working on visualizations, help other members	Yes
8 & 9	Access data from database & display data on web pages	Partially
10 & 11	Testing, debugging, meet with client	Not started
12	Final website launch	Not started

- *Completion declaration*

The task **access data from database & display data on web pages** is partially done and behind schedule. Right now, the charts are able to display data from some external URL, but not from our database as database still needs modifications. This task will be caught up as soon as possible as it is the most important integration between front-end and back-end. Also, two to three more charts will be uploaded next week.

- *Role definition*

My proposed roles are **front-end programmer**, which hasn't been changed; we haven't started testing phase, so the role of a **tester** it is not active yet; as a **team leader**, I check each member's progress as well as arranging meetings.

Individual Achievement

- **Task Checklist**

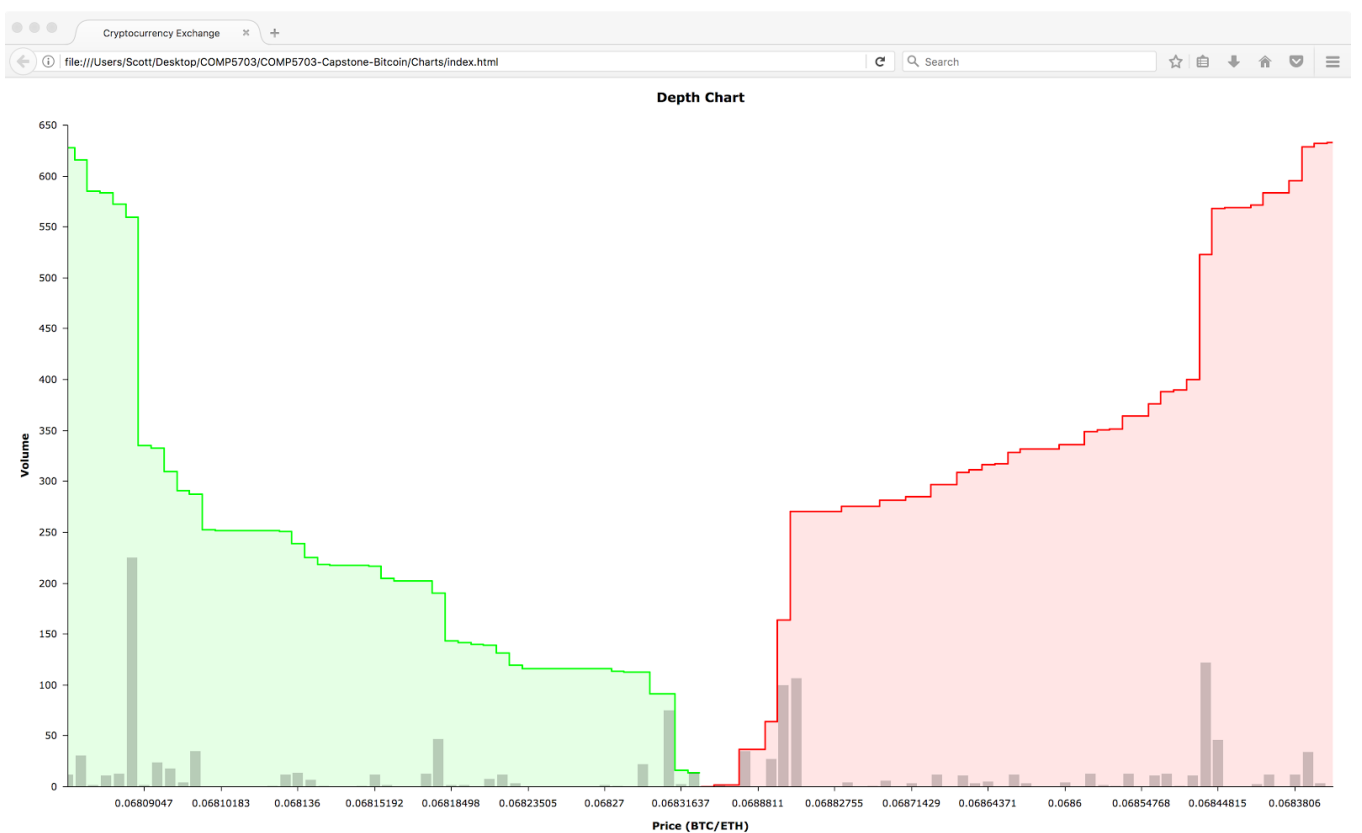

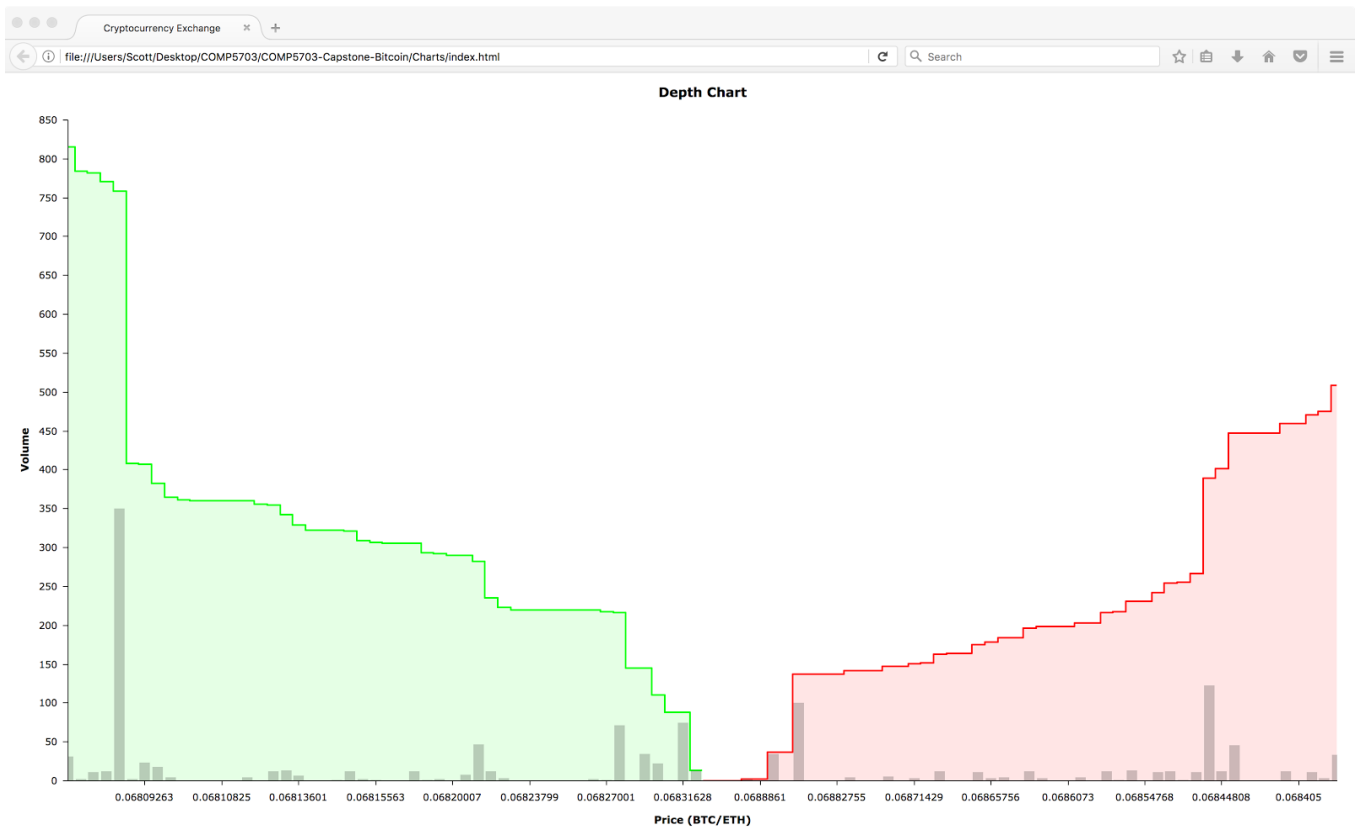

1. Build dynamic, interactive charts displaying stock exchange data;
2. Constantly check with UI designer (Hongyu);
3. As our database is still in progress, use data from external website instead to test whether the charts are working;
4. Help UI designer to clarify as well as solve problems;
5. Try to merge charts with web pages constructed by UI designer;
6. Check everyone's progress to make sure the project is on track;
7. Discuss about progress report with members;

- **Visualizations done so far**

Candle chart

Live depth chart

- *Evidence on slack*

Yesterday

We have to add some screen shot as well to show what we achieved now.

im start writing now

Yeah I see

or put screenshots in our individual report

There should be a part to describe what we achieved so far

in group one?

In individual is the specific one

make sense

I put the roles before milestone that looks better

Yesterday

Timeline and Milestone is good

I put the roles before milestone that looks better

krishna 🏠 3:40 PM

Good work guys

Hongyu Ai 4:05 PM

I add something in second part

Scott did some perfection

Then I am ok with all other content.

I start to write my own part, if there are any comments just contact me

scott 4:08 PM

Thanks @Hongyu Ai

Hongyu Ai 4:09 PM

scott 4:14 PM

check the highlighted part in PROGRESS

krishna 🏠 5:13 PM

Guys change or add anything by evening so that i would arrange it together.

Hongyu Ai 5:22 PM

Ok

I am done my work. Won't change anything

Arrange meeting

scott 6:48 PM

set up a reminder "Meeting" in this channel at 10AM tomorrow, Australian Eastern Daylight Time.

- Evidence on Bitbucket via commits
